Dan Anderson
All-Color Powder Coating
298 N. Burr Oak Avenue
Oregon, WI 53575

Dear Mr. Anderson,

Congratulations! All-Color Powder Coating has passed the PCI 3000 Certification Maintenance audit. We are proud to recognize organizations like All-Color Powder Coating who, along with the Powder Coating Institute, strive to see improved quality across our industry.

By completing the certification maintenance self-audit process, All-Color Powder Coating has confirmed that the processes and procedures required to maintain PCI 3000 Certification have been sustained and continued. Your certification is valid through July 2027.

All-Color Powder Coating continues to demonstrate that it understands powder coating is a high-performance painting process that must be maintained and controlled to optimize the performance of the finish. While this certification does not guarantee powder coating process performance, it reflects that All-Color Powder Coating has the capability, processes, and competency in place to supply a high-quality powder coated product.

In support of your continued PCI 3000 Certified status, the following documents accompany this letter.

- PCI digital certificate
- Logos and usage guidelines
- Letter to manufacturers verifying your certification
- News release template to promote your certification
- PCI Certification Press List
- Signed audit report(s) for your records

Best regards,

Steve Ladatto
PCI Technical Director
